

International Conference on Sustainable Mobility Applications, Renewables and Technology (SMART2015), Kuwait, November 23-25, 2015

Call for Contributions to the Special Session on Green Building Energy Management (GBEM)

By Mounir Bouzguenda (King Faisal University, Al Ahsa, Saudi Arabia)

Thematic: SMART2015 "Green Building Energy Management" special session aims to showcase the latest developments and technical solutions in areas related to green building technologies and platforms, green computing and communications, energy efficient low power hardware and software design, low power communication protocols, and test-beds, and other important advances.

Papers are invited in the following areas, but not limited to:

- Green building technologies suitable for hot, arid and desert climates
- Sustainable construction materials and processes
- Building experimental test-beds and results
- Building occupancy based energy management
- Wireless sensor networks and sensing applications for green building
- Low cost Home Area Network for controlling heavy-duty electric appliances for energy conservation.
- Demand Response and seamless integration of alternate sources of energy such as solar energy, wind energy, biomass in the building energy system
- Energy education in green buildings

Submission: Prospective authors are invited to submit an extended abstract of two to three A4 pages, written in English. There is no specific template. Abstracts should be submitted directly to the special session organizer at mbuzguenda@kfu.edu.sa.

Important Deadlines:

July 15, 2015	Abstract submission
July 31 2015	Provisional acceptance
August 31, 2015	Full paper submission
September 25, 2015	Final acceptance
